

YOUR FIRST VISIT WITH US

Welcome to our practice! We are excited you have chosen to visit us for a new patient consultation, comprehensive oral evaluation and dental cleaning. On behalf of the entire team here at Oak Tree Dental, we look forward to meeting you and would like to share some information with you prior to your visit.

At your first visit with our practice you will be greeted by Marissa or Yesenia, our front office team, who will gladly answer any questions you may have. Then, with the help of one of our qualified dental assistants, Laura or Robin, we will examine your teeth, perform an oral cancer examination, and take and review necessary x-rays. We will also evaluate the health of your gums and clean your teeth. A complete treatment plan will be developed and we will discuss the diagnosis with you in detail and all the treatment options that may be available for you. Please allow approximately 2 hours for this first visit.

If any dental treatment is diagnosed, a treatment plan and estimate will be prepared for you prior to beginning any procedures. Marissa or Yesenia will check insurance benefits for you and discuss our practice's comfortable financial options, if needed.

We encourage you to also download and complete the [New Patient Forms](#) on our website to save you the time of completing these forms at your first appointment. Otherwise, please arrive 15 minutes early to complete the forms so you can be seen at your appointed time.

Again, we look forward to introducing you to our practice.

To your health,

Melissa Lipat, DDS

Jason Hamel, DMD
